

Appendix 1 (as supplied by the authors): Sample of suicide attempts and person-years at risk by 4 different strata^a

Sex	In care status	SES	Age group, yr	Psychiatric disorder	Parental psychopathology	Suicide attempts	Person-years at risk
Male	No	R1	12-17	Yes	Yes	143	11976.24
Male	No	R1	12-17	No	Yes	53	55360.73
Female	No	R1	12-17	Yes	Yes	303	15595.14
Female	No	R1	12-17	No	Yes	131	48492.05

R1= lowest rural household income quintile, SES = socioeconomic status.

^a e.g., Row 1 is one stratum that was created and shows the suicide attempts and person-years at risk for 12-17 year-old males from the lowest rural household income quintile, who were not in care, and who had a psychiatric disorder and a parent who had a psychiatric disorder.
